

HEALTH & SAFETY POLICY

Management is responsible and committed towards the health & safety of its employees. Sometime a small incident can turn into a big casualty even after adopting the safety standards and programs. Such casualty should be treated patiently and effectively so that the wastage of time and chaos can be prevented and life of the people can be saved. For this, company has a pre defined and clear system.

Company management follow all the rules and regulation related to the health and safety and adopts all the measures of safety so that:

- Our employees and the nearby residing people can be saved.
- Assets and environment can be saved and its loss can be minimized.
- In case of a casualty, the effected people can be helped and saved out safely.
- Affected area can be repaired out instantly and work can be start.
- Incident can be reviewed, its causes can be analysed and removed so that this never happen again in future.
- Revaluation of the incident and casualty management for future evaluation reference.
